Q udaynatthani

Summary _____

Motivated and detail-oriented web developer skilled in front-end and back-end technologies including React, Node.js, JavaScript, and REST APIs. Strong foundation in responsive design, version control, and modern development frameworks. Eager to contribute and grow in a collaborative environment through hands-on project experience.

Education _____

B.E. Information Technology, Thadomal Shahani Engineering College

Graduation in 2027

Attributes _____

Non Technical

- · Effective communicator, proficient in Hindi, Marathi and English
- · Detail-oriented
- · Able to work as part of a team and lead when required
- Keen to learn new things and undergo professional development

Technical

- Frontend: HTML, CSS, JavaScript, React, Bootstrap, Tailwind CSS.
- Backend & APIs: Node.js, REST API, Firebase, MongoDB.
- · Programming: Java, C, Python.
- · Tools & Platforms: Git, GitHub, VS Code.

Experience _____

Web Development Intern

College (Virtual) | Jan 2025 – Mar 2025

- Designed and developed a job portal for students and employers using HTML, CSS, JavaScript, and Node.is.
- Enabled user roles, allowing employers to post jobs and students to apply.
- Integrated responsive UI elements using Tailwind CSS and Bootstrap.
- Built the platform's logic similar to Internshala's model with dynamic job filtering and role-based access.
- · Collaborated using Git and deployed the platform to GitHub.

Projects

Digital Time Capsule Platform – React JS, MongoDB

- Built a secure web app for users to store messages, photos, and videos that can be unlocked on a future date.
- · Focused on enhancing the emotional user experience with nostalgia and anticipation.
- · Used MongoDB for data storage and ensured security and authentication for private memories.

Job Portal – HTML, CSS, JavaScript, Node.js, React

- · Created a full-stack job portal allowing employers to post jobs and students to apply.
- Implemented role-based UI and real-time updates.
- Used local storage and REST APIs to handle application data.

Gemini Chatbot Clone – React JS, Firebase, Gemini 2.0 Flash API

- · Developed a Gemini-style chat UI with real-time response rendering and Google Auth integration.
- · Used Firebase for backend, authentication, and Firestore for history tracking.
- · Integrated Gemini 2.0 Flash API for dynamic chatbot interaction and conversation flow.
